1980 INSPECTIONS OF

FERTILIZER PESTICIDE AND FEED PRODUCTS

J. Gordon Hanna

Digitized by the Internet Archive in 2011 with funding from LYRASIS members and Sloan Foundation

1980 Inspections of

Fertilizer, Pesticide and Feed Procucts

Data obtained by chemical analysis of officially collected samples of commercial feeds, fertilizers and pesticide formulations are contained in this report. The tables show the number of samples from each manufacturer (in parenthesis), the number of determinations made for each guaranteed ingredient, the number of deficiencies, and the average percent of claims for each component.

The deficiencies noted for feeds samples are based on the permitted variations recommended by the Association of American Feed Control Officials, the investigational allowances for fertilizers are those of the Association of American Plant Food Control Officials, and the permissive guarantee variations suggested by the Association of American Pesticide Control Officials are used for pesticide formulations.

Data for 814 samples of feed representing 61 manufacturers, 266 samples of fertilizer representing 20 manufacturers and 257 samples of pesticide representing 78 manufacturers are summarized.

The feed and fertilizer laws are administered by the Commissioner of Agriculture. The pesticide law is under the direction of the Commissioner of Environmental Protection.

Analytical work was by M. Fuzesi, W. Glowa, R. Hastings, M.A. Illig, H. Kocaba, M. Pyles, and S. Squires. The report was assembled and typed by S. Cwirka.

J. Gordon Hanna, Chief Chemist
